New Zealand

Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report

Approved By:

Hugh Maginnis, Agricultural Counselor

Prepared By:

Vinita Sharma, Marketing Specialist

Report Highlights:

This report outlines regulatory requirements for food and agricultural products exported to New Zealand. The sections on food laws, copyright and trademarks laws have been updated since the last report.

Section I. List of All Export Certificates Required By Government

Summary

Ministry of Primary Industries (MPI) is the key organization that regulates food imported into New Zealand. In 2011, the New Zealand Food Safety Authority (NZFSA) and Biosecurity New Zealand (BNZ) merged with the Ministry of Agriculture and Forestry (MAF). In April 2012, the Ministry of Fisheries was then merged with expanded MAF to create the Ministry for Primary Industries (MPI).

The MPI has the lead role in biosecurity protection (e.g. preventing unwanted pests and diseases being imported into New Zealand, and controlling, managing or eradicating them should they arrive). New Zealand has strict biosecurity rules and most unprocessed products cannot be imported into New Zealand unless an import health standard has been developed. New Zealand defines biosecurity as “the exclusion, eradication or effective management of risks posed by pests and diseases to the economy, environment and human health.” New Zealand’s biosecurity requirements cover terrestrial, freshwater and marine environments. Import health standards specify the biosecurity requirements that must be met for trade to occur.

In New Zealand, import health standards are based upon risk analyses, which assess either a commodity or a pest/pathway combination. Biosecurity New Zealand takes legislative requirements and international obligations into account when conducting risk analyses and developing import health standards. The principal document for all New Zealand import health standards is the Biosecurity Act (1993). The act provides for management of risks associated with imported goods such as produce, seeds and plants principally through import health standards.

In March 2015, the New Zealand government approved the **Food Act 2014**, which will replace Biosecurity Act (1993). This new Act will come into force on March 1, 2016. The Food Act 2014 promotes food safety by focusing on the processes of food production, not the premises where food is made. A central feature of the new Act is a sliding scale where businesses that are higher risk, from a food safety point of view, will operate under more stringent food safety requirements and checks than lower-risk food businesses.

The new law recognizes that each business is different – unlike the old Food Act 1981 and its one-size-fits-all approach to food safety. The new Act means that a corner dairy operator who reheats meat pies won't be treated in the same way as the meat pie manufacturer.

The Act brings in new food safety measures:

- food control plans (FCPs) for higher-risk activities
- national programs for lower-risk activities.

New Zealand also adheres to the guidelines on risk analysis developed under the auspices of the Interim Commission on Phytosanitary Measures operating within the framework of the International Plant Protection Convention, and the World Trade Organization Agreement on the Application of Sanitary and Phytosanitary Measures. Information on import health standards for specific products can be found <http://mpi.govt.nz/law-and-policy/requirements/import-health-standards/>

Please see New Zealand Food and Agricultural Import Regulations and Standards (FAIRS) report on Food Laws, Food Labeling and Packing requirements for imported foods in New Zealand, reports can be found at:

<http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx>

Export Certification Requirements

The table below provides export certificate requirements for many products exported to New Zealand from the United States.

Export Certificates and Attestations Required by New Zealand				
Products	Title of Certificate	Attestation Required on Certificate	Purpose	Requested By
Peanuts	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	Ministry of Primary Industries www.mpi.govt.nz
	Certificate of analysis from USDA or a State Department of Agriculture required	Consignments are tested at intervals depending on the frequency of import. In all cases, a certificate of analysis is required for each consignment. Please check NZFSA requirement at Imported Food Products - Peanuts and Pistachios	Peanuts are considered a high risk food because they have been found to contain mycotoxins, mold and insects.	NZFSA www.nzfsa.govt.nz
Roasted/ Salted Pistachios	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more then 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	Ministry of Primary Industries www.mpi.govt.nz
	Certificate of analysis from USDA or a State Department of Agriculture required	Consignments are tested at intervals depending on the frequency of import. In all cases, a certificate of analysis is required for each consignment. Please check NZFSA requirement at Imported Food Products - Peanuts and Pistachios	Pistachios are considered a high risk food because they have been found to contain mycotoxins, mold & insects.	NZFSA www.nzfsa.govt.nz
Walnuts, Pecans,	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand, if	Biosecurity	Ministry of Primary Industries

Almonds		<p>packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required.</p> <p>Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption or more information.</p>		www.mpi.govt.nz
Dried Fruits	No phytosanitary certificate required	<p>There are no certification or inspection requirements for dried, freeze dried, dehydrated or flaked fruit and vegetables that are commercially manufactured or produced and listed in the Plants Biosecurity Index database, except for those that may have seeds that are entered as "Entry Prohibited" and those listed in sections 9.3, 9.4 and 9.7 of the Stored products for Human Consumption import health standard.</p>	Biosecurity	<p>Ministry of Primary Industries www.mpi.govt.nz</p>
Stone Fruits (California Nectarines and Peaches)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required	<p>Please see section 6.1.4 of the Fresh Peach and Nectarine from California import health standard regarding phytosanitary certificate requirements.</p>	Biosecurity	<p>Ministry of Primary Industries www.mpi.govt.nz</p>
	Additional declarations are required on the phytosanitary certificate	<p>APHIS must provide the additional declarations to the phytosanitary certificate:</p> <p>"The peaches and nectarines in this consignment have:</p> <ul style="list-style-type: none"> - been inspected in accordance with appropriate official procedures and found to be free of any visually detectable regulated pests specified by the New Zealand Ministry of Agriculture and Forestry. <p>AND</p> <ul style="list-style-type: none"> - been treated in accordance with Appendix 1(b) of the Workplan between NZ MAF and APHIS, USDA. <p>AND</p> <ul style="list-style-type: none"> - undergone appropriate pest control activities that are effective against those Risk group 2 regulated pests specified by NZ MAF. <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from those Risk group 2 regulated pests specified by NZ MAF."</p>		

		Please check section 6.1.5 of the Fresh Peach and Nectarine from California import health standard for the most recent requirements.		
Table Grapes (State of California)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 6.1.5 of the import health standard on Table Grapes from the State of California for information on phytosanitary requirements.	Biosecurity	Ministry of Primary Industries www.mpi.govt.nz
	Additional declarations required on the phytosanitary certificate	APHIS must provide the following additional declarations to the phytosanitary certificates: (i) This is to certify that the table grapes described herein have been inspected according to appropriate official procedures and are considered to be free from the quarantine pests specified by New Zealand MAF and to conform with the current phytosanitary requirements of New Zealand MAF, including those for regulated non-quarantine pests; AND (ii) The table grapes in this consignment have been treated in accordance with Appendix 1(b) of the Workplan between NZ MAF and USDA APHIS. (iii) from the United States of America, treated in accordance with the measures specified by MAF Biosecurity New Zealand for the access of host material of <i>Drosophila suzukii</i> . Please check section 6.1.5 of the Table Grapes from the State of California import health standard for the most recent requirements.		
Cherries (State of California)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 4.1 of the import health standard on http://mpi.govt.nz/document-vault/1704 for information on phytosanitary requirements.	Biosecurity	Ministry of Primary Industries www.mpi.govt.nz
	Additional declarations required on the	APHIS must provide the following additional declarations to the phytosanitary certificates:		

	phytosanitary certificate	<p>The cherries in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Monilinia fructigena</i></p> <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i> AND</p> <p>(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly</p> <p>Please see page 372 of the import health standard on http://mpi.govt.nz/document-vault/1704 for information on additional declaration on phytosanitary certificate</p>		
Cherries - <i>Prunus avium</i> (States of Washington, Oregon and Idaho)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required	Please see section 6.1.5 of the import health standard on http://mpi.govt.nz/document-vault/1704 for information on phytosanitary requirements.	Biosecurity	MPI www.mpi.govt.nz
	Additional declarations on the phytosanitary certificate required	<p>APHIS must also provide the following additional declarations: (i) This is to certify that the cherries described herein have been inspected according to appropriate official procedures and are considered to be free from the quarantine pests specified by New Zealand MAF and to conform with the current phytosanitary requirements of New Zealand MAF, including those for regulated non-quarantine pests.;</p> <p>(ii) This is to certify that the cherries in this consignment have undergone appropriate pest control activities that are effective against those regulated</p>		

		<p>high impact pests specified by NZ MAF.</p> <p>Please see section 6.1.6 of the import health standard on http://mpi.govt.nz/document-vault/1704 for information on additional phytosanitary requirements.</p>		
<p>Fruits (Mandarin/ tangerine, orange, apricot, pears, plums)</p>	<p>Phytosanitary certificates issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) required for all fruit and vegetable consignments entering New Zealand</p>	<p>Please see section 2.1 and 2.2 of the import health standard on Fresh Fruit and Vegetables for information on phytosanitary certificates.</p>	<p>Biosecurity</p>	<p>MPI www.mpi.govt.nz</p>
	<p>Additional declaration required on the phytosanitary certificate required – Mandarin/ Tangerine</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: Mandarins/tangerines in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Aleurocanthus woglumi</i> ; <i>Spiroplasma citri</i> [VO] ; <i>Xanthomonas campestris</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Aleurocanthus woglumi</i> ; <i>Spiroplasma citri</i> [VO]; <i>Xanthomonas campestris</i> AND (iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from</p>		

		<p>the United States of America .</p> <p>Please see page 364 of Import Health Standard on Fresh Fruit and Vegetables for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate are required – Orange</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates:</p> <p>The oranges in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against:</p> <p><i>Aleurocanthus woglumi</i>; <i>Bemisia tabaci</i> [strain] <i>Thrips palmi</i> OR</p> <p>been sourced from an area free (verified by an official detection survey) from:</p> <p><i>Aleurocanthus woglumi</i> <i>Bemisia tabaci</i> [strain] <i>Thrips palmi</i> AND</p> <p>(iii) treated in accordance with Appendix 1(b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America</p> <p>Please see page 365 of Import Health Standard on Fresh Fruit and Vegetables for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate required – Apricot</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates:</p> <p>Apricots in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against:</p> <p><i>Monilinia fructigena</i> OR</p>		

		<p>been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i> AND (iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 371 of Import Health Standard on Fresh Fruit and Vegetables for more information</p>		
	<p>Additional declaration required on the phytosanitary certificate are required – Plums</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The plums in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Monilinia fructigena</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i> AND (iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 374 of Import Health Standard on Fresh Fruit and Vegetables for more information</p>		
	<p>Additional declaration required on the phytosanitary</p>	<p>The nectarines/peaches in this consignment have:</p> <p>i. been inspected in accordance</p>		

	certificate required- Nectarine/Peach	<p>with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>ii. (ii) undergone appropriate pest control activities that are effective against those risk group 2 regulated pests specified by NZ MAF. OR</p> <p>been sourced from an area free (verified by an official detection survey) from those risk group 2 regulated pests specified by NZ MAF. Note: Combinations of treatment and area freedom are permissible for the aforementioned RG2 pests. AND</p> <p>(iii) treated in accordance with Appendix 1 (b) of the Workplan between NZ MAF and APHIS, USDA.</p> <p>AND</p> <p>(vi) treated in accordance with the measures specified by MAF Biosecurity New Zealand for the access of host material of <i>Drosophila suzukii</i> from the United States of America.</p>		
	Additional declaration required on the phytosanitary certificate are required – Pears (State of Washington)	<p>The pears in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i> OR</p> <p>been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i> AND</p> <p>(iii) treated in accordance with Appendix 1(d) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into</p>		

		<p>New Zealand from the United States of America .</p> <p>Please see Import Health Standard on Pears from the State of Washington for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate required – Pears (State of California)</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The pears in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i> AND (iii) treated in accordance with Appendix 1(b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see Import Health Standard on Pears from the State of California for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate are required – Pears (State of Idaho)</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The pears in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against:</p>		

		<p><i>Conotrachelus nenuphar</i> OR been sourced from an area free (verified by an official detection survey) from:</p> <p><i>Conotrachelus nenuphar</i> AND (iii) treated in accordance with Appendix 1(h) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see Import Health Standard on Pears from the State of Idaho for more information.</p>		
	<p>Additional declaration required on the phytosanitary certificate required – Pears (State of Oregon)</p>	<p>The pears in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i></p> <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from:</p> <p><i>Conotrachelus nenuphar</i> AND (iii) treated in accordance with Appendix 1(i) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see Import Health Standard on Pears from the State of Oregon for more information.</p>		
<p>Grains/ Seeds for Human Consumption</p>	<p>Phytosanitary Certificate</p> <p>Additional declarations are</p>	<p>U.S. exporters must meet certification requirements for individual products. Various options from pre-inspection certification to post-entry treatments are available under specific grain and seed categories. Each grain and seed product has different certification</p>	<p>Biosecurity</p>	<p>MPI</p> <p>www.mpi.govt.nz</p>

	required depending on the product Grains/Seed Analysis Certificate	requirements. Please see Import Health Standard for Grains and Seeds and import regulations		
Shelf Stable Pet Foods with Bovine Meat	No phytosanitary certificate required	Please see section 7.2 of the import health standard on Pet Food for information on canned/retorted pet foods containing beef/other bovine meat products/by-products and other animal products.	Biosecurity	MPI www.mpi.govt.nz
	Zoosanitary certificate required	Please see section 10 of the import health standard on Pet Food or a sample Zoosanitary certificate.		
Seeds for Sowing	Basic Requirements	Only species of seeds and plants (including bulbs, cuttings, and tissue cultures) listed in the New Zealand Biosecurity Plants Index can only be imported into New Zealand. All seed for sowing imported into New Zealand must meet the Basic requirements (section 2.2.2) of the Seeds for Sowing import health standard, as well as any specific requirements as indicated by the Biosecurity Index.	Biosecurity	MPI www.mpi.govt.nz
	Phytosanitary certificate issued by APHIS required Additional declarations required depending on the type of seed Seed Analysis Certificate	Phytosanitary certificate is required certifying that seed for sowing has been inspected by USDA and found to be free of any visually detectable regulated pests, and conforms to New Zealand's current import requirements. For additional declaration, please see section 3.5 of the Import Health Standard of Seeds for sowing . Please see section 2.2.2.4 section of the Import Health Standard of Seeds for seed analysis certificate requirements		
Frozen Pig by- products	Zoosanitary certificate required.	Please see section 12 of Import Health Standard on Frozen Pig Meat for a sample Zoosanitary certificate.	Biosecurity	MPI www.mpi.govt.nz

Section II. Purpose of Specific Export Certificate(s)

See table in Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Please refer to the Table under Section I, for required attestations and the Biosecurity New Zealand website for specific information on IHSs and attestation requirements.

<http://www.biosecurity.govt.nz/ihs/search>

Section IV. Government Certificate's Legal Entry Requirements

Entry requirements are set out on the Import Health Standards.

Original documents relating to the shipment must accompany each shipment. Most certificates are valid for one shipment only and are required to be issued by APHIS, USDA.

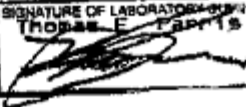

Section V. Other Certification/Accreditation Requirements

U.S. exporter are required to meet both biosecurity and food safety requirements. For more information on New Zealand's food safety requirements, please visit www.nzfsa.govt.nz. Please also refer to the FAS/Wellington report entitled Food and Agricultural Import Regulations & Standards which can be found at:

<http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx>.

-N-	-N-	-N-	-N-	-N-

Chickpea

Cicer arietinum

Other Determinations

Phyto exam 501.8 Grams
Soil exam 501.8 Grams

No injurious pest, disease or soil found.
The seed in this lot was examined by the Washington State Department of Agriculture - Seed Program and found to be free of weed seeds as specified by MAP in the "Schedule of Regulated Weed Seeds".

Findings: None.

Remarks

Analyzed using AOSA rules as a guideline.
Officially sampled by the Federal Grain Inspection Service.

Tests Requested: Phyto exam, Soil exam. No other tests requested.

WARRANTY: We warrant that the test results reported on this report were obtained by using AOSA methods as a guideline unless otherwise specified. Test results reflect the condition of a representative sample and do not reflect the condition of the seed lot from which the sample was taken. Officially drawn samples represent the condition of the lot at the time of sampling.
